## SUMMARY

I am a budding software developer and also an ambitious, determined, flexible, and results-driven individual with great team spirit. My career objective is to be a worthy asset to my employers thereby adding value to them and helping in actualizing their goals and objectives. I'm always ready to learn and refine my skills to achieve this goal and also grow as a person. Hence, I aim to work as hard as possible and keep at it till I get the job done.

Ultimately, the end goal is to achieve success wherever I find myself.

## EXPERIENCE

---

**Software Engineer** – MidroHub (Freelance team) **Jan. 2022 – Present**

- Worked in the Frontend team to build responsive websites.
- Assisted new intakes in the development of software.

**Contract Research Assistant** – African Institute of Technology and Innovation **September.2022**

- Conducted detailed research of intended courses according to the company's needs.
- Used research findings to create a wholistic content to be used for students.
- Created detailed course content to be taught by potential teachers.
- Determined areas of research needed for the growth of the institute.

## CERTIFICATIONS AND TRAINING

---

**Software Engineering** – MidroHub (Freelance team) **Sept. 2021 – Present**

- Learning NodeJS for web programming.
- Learning C# for ASP.net web programming.
- Learnt SQL and Database programming.
- Learnt Data Management.

**AWS Machine Learning Foundations** – Udacity **Jul. 2022 – September.2022**

- Learnt Supervised, Unsupervised and Reinforcement Learning.
- Learnt Reinforcement Learning with AWS DeepRacer.
- Learnt Generative AI with AWS DeepComposer.
- Learnt Common Software Engineering Practices.
- Learnt Object-Oriented Programming in Python.

**Backend (Python)** – Zuri Team, Inc **May. 2022 – August.2022**

- Learnt Python.
- Learnt Django API Development and Documentation.
- Used Django for CRUD

**Full Stack Development using Flask (Python)** – ALX - Udacity **May. 2022 – July.2022**

- Learnt Server Deployment and Containerization
- Learnt SQL and Data Modelling for the Web.
- Learnt API Development and Documentation.
- Learnt Identity Access Management.

**Introduction to Python Programming** – Udacity **May. 2022**

**Introduction to Flutter Development using Dart** – The App Brewery **Sept. 2020**

## EDUCATION

- **B.Sc. Systems Engineering** – University of Lagos, Akoka, Nigeria

**2018 – Present**

## TECHNICAL SKILLS

- |              |                             |                      |
|--------------|-----------------------------|----------------------|
| • HTML       | • MSSQL                     | • AWS and Kubernetes |
| • CSS        | • PostgreSQL                | • Docker             |
| • JavaScript | • Python                    | • CI/CD              |
| • Git        | • Dart                      | • Auth0              |
| • C#         | • 3D Modelling (Fusion 360) |                      |
